Experience

Senior Product Designer **Microsoft, Inclusive Tech Lab**

March 2024- Present

- Led end-to-end product development for new AI system-level adaptive inputs, assistive hardware and Windows 11 software, from leadership pitches to product ship
- Collaborated closely with development teams, and defined new workflows utilizing vibe-coded front end design and development
- Developed interactive hardware and software prototypes and proof of concepts
- Facilitated cross-company inclusive design sprints, co-design sprints with disabled users, and user research studies
- Led the Windows + Devices D&I team, partnering with upper leadership to create strong diversity and inclusion efforts for the design org
- Performed accessibility compliance checks for Microsoft hardware and software

Product Designer **Microsoft, Mixed Reality Research + Design**

May 2022- March 2024

- End-to-end product and interaction design for HoloLens2, Meta Quest software, and future AR hardware
- Interaction design for AI in Mixed Reality and AR
- Designed overall product strategy and vision for future products
- Animated mockups, and built Unity prototypes in C# to test designs and interaction potential
- Modeled 3D environment assets
- Led the creation of new visual design, creation and organization of component libraries
- Collaborated with User Research, Industrial Design, and Engineering teams to deliver products
- Contributed to industrial design and hardware experience design
- Led design of the Meta and Microsoft remote desktop and immersive application collaboration
- Led inclusivity and accessibility efforts for Mixed Reality

Senior XR Product Designer **Spatial IO**

May 2021- May 2022

- Led product and interaction design for web, mobile, and XR Platforms
- Created interactive prototypes for web and headset
- Collaborated with Product, Engineering, and Marketing to create and deliver end-to-end product specs and design documentation
- Organized and led onsite design sprints
- Modeled 3D environment assets, and optimized models and designs for Unity pipelines
- Led the creation of overall product guidelines, and the company's design principles
- Organized and conducted user studies and user interviews

Senior UX Designer **Neato Robotics**

Mar 2020- May 2021

- Owned areas of the new Mobile app (Analytics, Notifications, Mapping, and Self-Cleaning Base)
- Designed and developed wireframes, user studies, and prototypes
- Worked closely end-to-end with crossfunctional partners (Product, Engineering, Marketing) to deliver designs
- Primary designer for all animations and motion concepts for the new MyNeato mobile app
- Participated and contributed to cross functional remote Design Sprints
- Led brainstorming sessions on the creative direction of promotional content to illustrate North Star concepts
- Participated in UX Research and Usability Studies
- Served as a backup 3D modeler for any industrial design needs

Lead Digital Media Designer 360Fuel (Gas Pump TV)

Nov 2017-Jan 2019

- Managed graphic design and audio/visual team
- Led the User Experience design of Smart Gas Pump screen hardware, and the user journey between Gas Pump hardware and C-stores
- Worked cross-functionally with engineers to design and build the Website and Mobile App
- Created Motion Graphics for third party clients, internal website, and Mobile App
- Managed compliance of third party materials for internal and external clients

Creative Director Sprout Innovative

Jan 2016-May 2021

- Networked with clients to create and direct the production of a variety of media including motion graphics, marketing collateral, UI/UX, and Game Design
- Large-scale print design for clients and events
- Worked with developers to implement UX flows and animations in mobile apps, websites, and games
- Animation and design for films (Most notable, *Helen / Believe*, 2023)
- Mentored recent graduates and assisted in career development

Skills

- Inclusive Design & Accessibility
- AI-Assisted Product Development
- Product Strategy & Vision
- UX Research & Co-Design
- Interaction Design
- Design Systems
- Rapid Prototyping (Unity, C#)
- Mixed Reality (XR/AR/VR)
- Hardware & Assistive Technology
- Motion Design & Visual Communication
- Public Speaking

Education

BFA, Animation & Visual Arts | University of Louisiana, Lafayette
